## Introduction

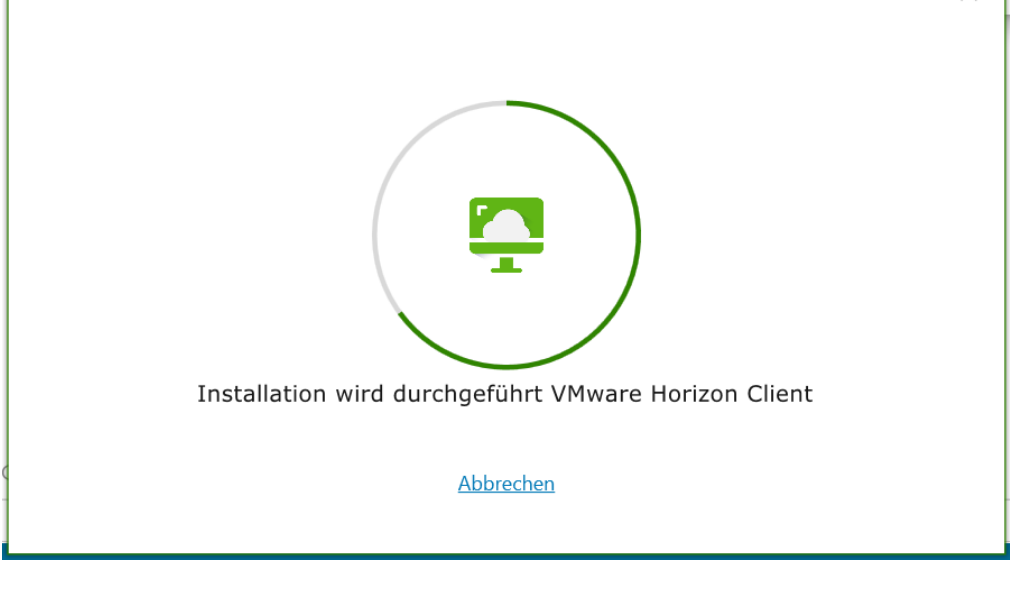

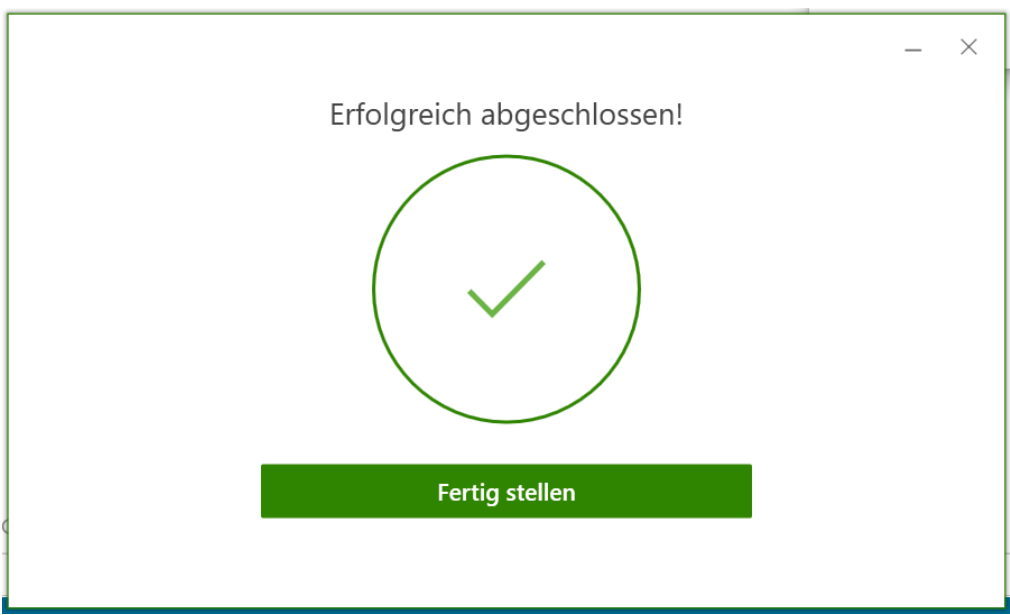

This Knowledge will describe how to install the "**VMware Horizon Client**" application on a private computer and how to establish a connection to the **Bell Food Group** VDI Portal

## Instructions

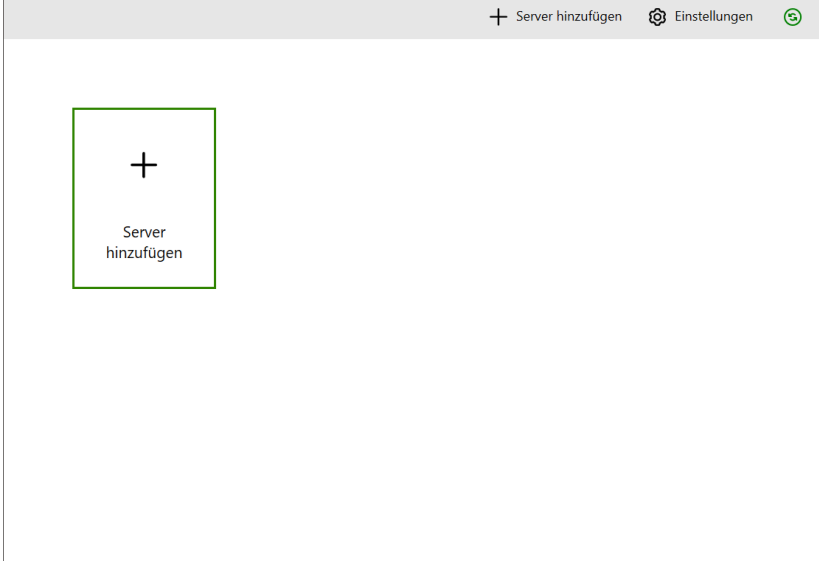

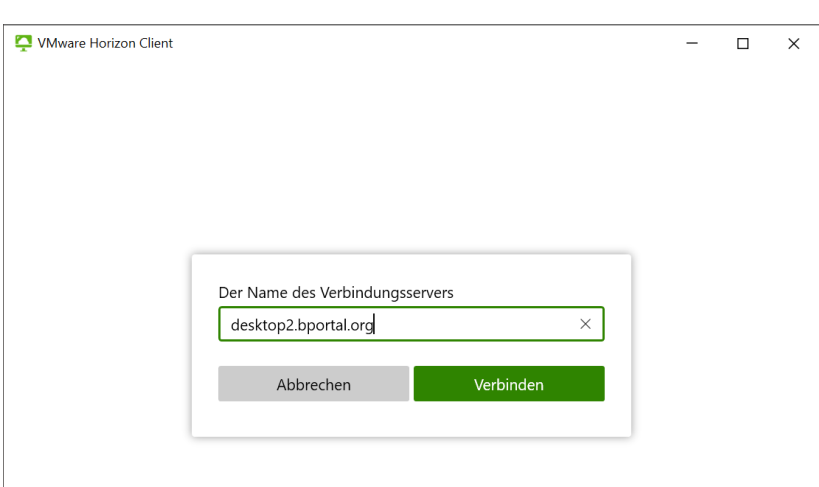

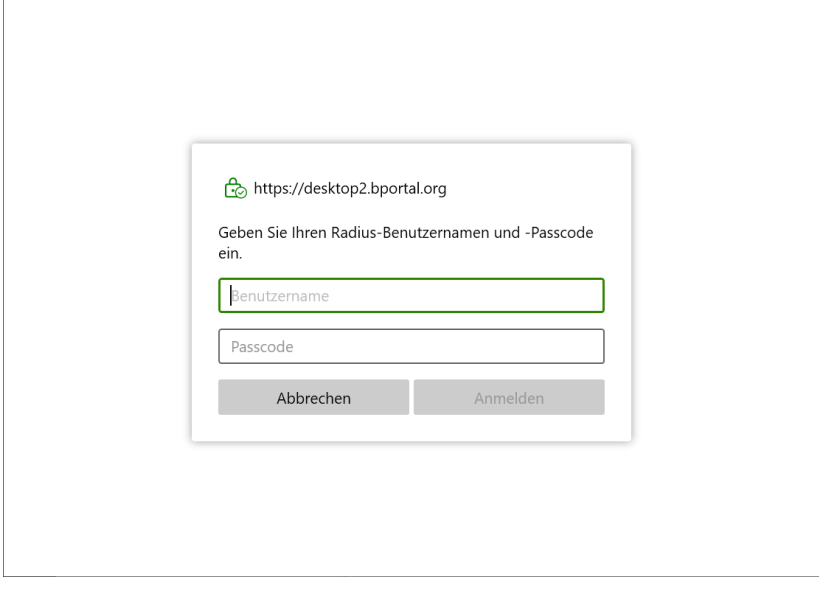

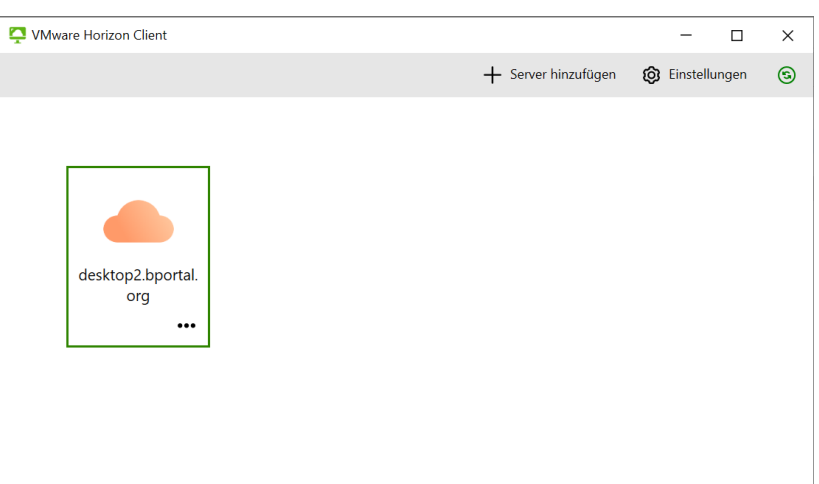

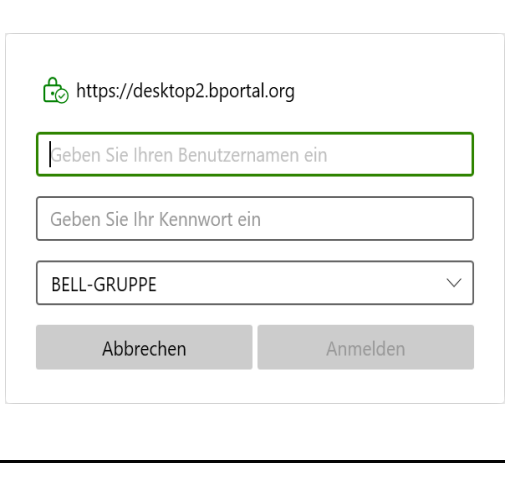

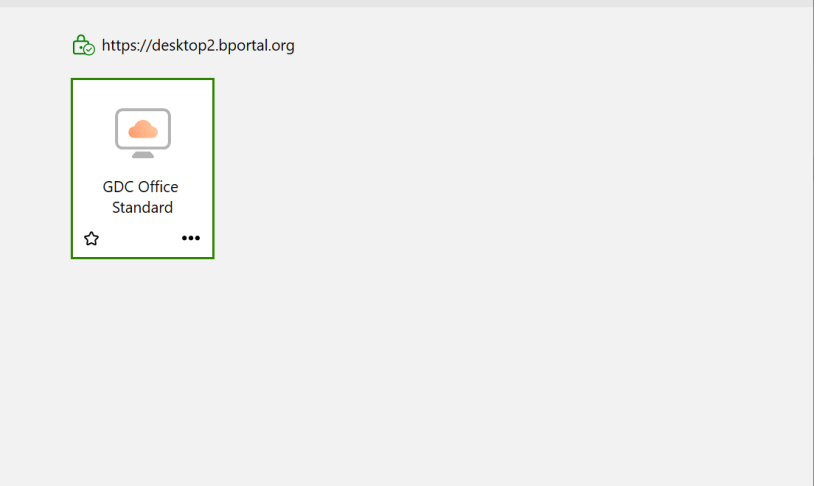

### 1. Download the official VMware View Client

	In the browser, enter the link <a href="https://desktop2.bportal.org">https://desktop2.bportal.org</a> and click 'Install VMware Horizon Client'.
	Select and download the appropriate client according to your operating system.

### 2. Installing the VMware View Client

 	Start the downloaded file with a double click. Confirm the license agreement and continue by clicking 'Accept and install'.
	The installation was completed successfully!

### 3. Establishing a connection

	After successful installation, you can launch 'VMware Horizon Client' from the desktop, or from the Start menu, and the following window will appear
 	Click "Add Server" and enter "desktop2.bportal.org". After you click "Connect", please enter your username and password and click "Login"
	Please accept this connection either via the app "Bell Food Group Access" installed on your smartphone or by entering the code received via SMS
 	To finally access the virtual desktop, please enter your <b>username</b> and <b>password</b> and click on " <b>Login</b> "
	You can now start your assigned Windows virtual desktop
